

Emission Compliance Excellence with

OCEANOPT

Our Expertise: Emissions Management

Effortlessly track and reduce your vessel's carbon emissions with our comprehensive approach. We are dedicated to helping you stay ahead of environmental regulations while minimising your carbon footprint.

We offer an extensive suite of emissions management services:

- Emission Data Collection
- Data Quality and Integrity
- Data Submission and Verification
- Accounting
- Purchasing
- Administration and Management of EUA's and Accounts
- Holistic Compliance Advisory Services

Emissions Data Collection/ Data Quality and Integrity

Data Accuracy and Integrity

Our team is committed to providing accurate and reliable emissions data. We employ stringent verification protocols to ensure compliance with regulatory standards. Continuous improvement is at the core of our operations, as we constantly refine our processes to meet evolving industry requirements.

Expert Guidance

Leverage the expertise of our specialised team to optimise your data quality practices. Whether you need assistance with monitoring, reporting, or improving emission reduction strategies, we are here to support you every step of the way.

Data Verification and Submission

We take care to submit and verify data through accredited bodies, ensuring that voyage and monthly statements are delivered to our clients promptly. This helps us maintain compliance with charter party agreements and clauses, providing you with peace of mind regarding regulatory requirements.

Accounting

With our focus on high-quality emission data, we have developed a sophisticated system and procedures to address anticipated emission allowance obligations. This system streamlines the issuance of emission statements tailored to specific periods or voyages, along with generating declarations and invoices for emission allowances.

Our meticulous process involves closely monitoring receivables and emission allowances purchases, which enhances the overall experience for vessel owners. We keep a close eye on emissions balances, ensuring accurate allocation of received emission allowances to specific voyages. Our dedicated team of experts is committed to assisting you in managing the complexities of the EU ETS (European Union Emissions Trading System).

Additionally, we offer comprehensive insights into the evolving landscape of EU ETS obligations, providing valuable guidance as regulations mature and progress.

Purchasing

Access to Extensive Network: As pioneers in the EU Emissions Trading System (ETS), we offer access to an extensive network of potential vendors, organizations, and traders for emission allowance trading. Our expertise enables us to guide you through the essential steps necessary to prepare your company for potential inquiries and obligations that may arise in the future. Leveraging our team's experience, we assist in navigating and executing your strategy based on your commercial position and input, ensuring the seamless implementation and realisation of your envisioned action plan.

Administration and Management of EUA's and Accounts

Comprehensive Administration Services: Our dedicated team provides comprehensive administration and management services for trading and maritime operator holding accounts, serving as authorised representatives. This includes initiating transactions on behalf of the client, thereby reducing direct involvement in the transactional process. We maintain a primary client contact solely for the final approval stage, ensuring efficient communication and collaboration throughout the process.

Holistic Consultancy and Compliance Advisory Services

Expert Guidance on EU ETS Implementation: Specialising in advising and guiding clients through the implementation of the EU ETS, our team offers crucial insights into key aspects of the regulation. We provide essential advice on the necessary steps to achieve compliance, ensuring a seamless alignment between client understanding and planned strategies. Staying abreast of regulatory developments, we advocate for the implementation of best practices to facilitate compliance.

Stay Ahead with Industry Leadership

Regular Updates and Proactive Decision-Making: As leaders in the EU ETS, we offer regular updates on evolving environmental regulations. Our timely insights empower proactive decision-making, keeping you updated and prepared as regulations evolve. With our proactive approach, we ensure you are well-positioned for compliance in the ever-changing regulatory landscape.

Ocean Opt Platform: An advanced Fleet Performance and Emissions Monitoring Software

Ocean Opt's extensive range of services are supported by a state-of-the-art performance analysis and Emissions Management platform that helps track emissions on a real time basis and manages the allowances for all stake holders including ship owners and charterers.

Why Choose Ocean Opt

Experience Matters

Benefit from our rich history of serving a diverse clientele and managing a substantial fleet.

Dedicated Specialist Team

Boasting a diverse team of experts, including Compliance Officers, Seasoned Marine Engineers, Nautical Officers, Naval Architects, and Voyage Data Specialists, we are dedicated to delivering customised and comprehensive carbon services.

Proactive Compliance Approach

We collaborate with a diverse array of industry-leading verifiers, underlining our commitment to proactive compliance management. This strategic partnership ensures our continual readiness to navigate and adhere to evolving regulations seamlessly.

Continuous Improvement

We are committed to precision and reliability with the strong philosophy in continuously improving and evolving. Embark on a journey towards carbon compliance excellence with Ocean Opt.

Choose a partner dedicated to guiding vessels through regulatory adherence while optimizing operational efficiency!
