OCEANOPT

Who We Are & What We Do

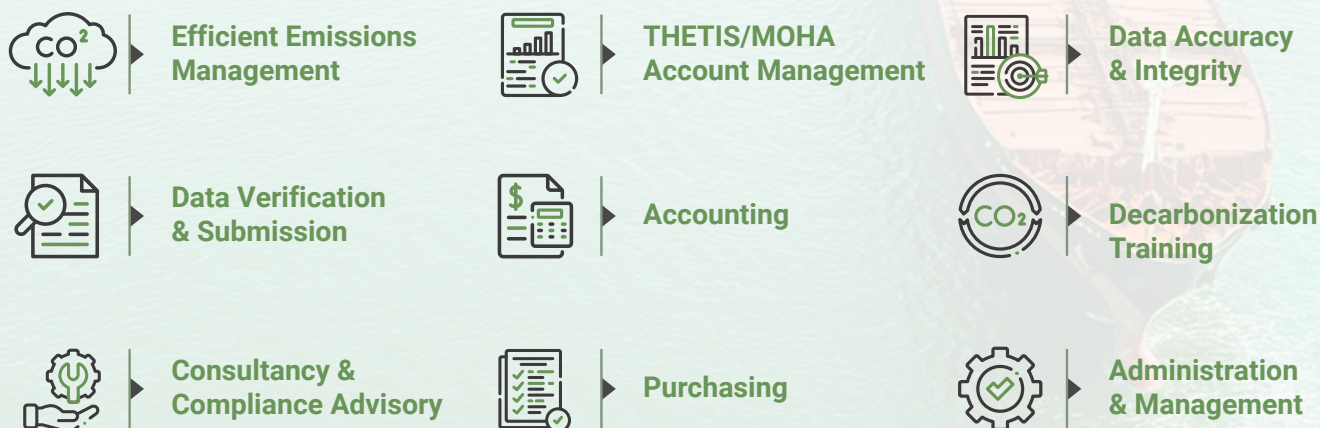

At OceanOpt, we're revolutionizing emissions management for the shipping industry. As a proud member of the Schulte Group, with over 20+ years of experience, we bring unparalleled value to ship owners, managers, and charterers, helping you manage the complexities of emissions tracking, reduction, and regulatory compliance with confidence.

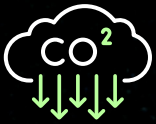

With vessels already under performance optimization contracts, and subscribing to EU ETS solutions even before its roll out in 2024, we are not just keeping pace with industry standards, we are setting them. We offer end-to-end solutions for IMO DCS, EU MRV, EU ETS and Fuel EU compliance including full Data Management for all regulatory requirements. Our mission is to empower you with cutting-edge tools, consultancy, and data-driven insights to ensure your fleet achieves full regulatory and environmental compliance.

Comprehensive Emissions Management, Tailored For Your Fleet

At OceanOpt, we deliver a suite of innovative services designed to transform how the shipping industry manages emissions. Leveraging cutting-edge technology and decades of maritime expertise, we provide ship owners, managers, and charterers with the tools and insights needed to optimize performance, ensure compliance, and reduce environmental impact.

Our Services:

Efficient Emissions Management

Master Emissions with Ease

Track emissions and ensure compliance effortlessly with a seamless, end-to-end service. Rely on expert management of daily vessel logs, EU Allowance procurement, data collection, verification, and submissions to authorities tailored to your needs. Sail confidently, cut costs, and stay compliant with our professional services, guiding you every step of the way.

THETIS/MOHA Account Management

Your Compliance, Our Expertise

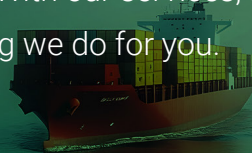

We ensure seamless management of your Thetis MRV and MOHA accounts, critical for EU emissions compliance. Thetis MRV, a centralized platform, tracks vessel emissions, supports verifiers in issuing Documents of Compliance (DOC), and aligns with EU MRV regulations. MOHA, part of the EU Registry, enables ship owners, managers, and charterers to surrender CO2 allowances under EU ETS. We handle account setup, user permissions, and monitoring plans for Thetis, while preparing MOHA applications, managing allowances, and submitting verified data. From liaising with EMSA and accredited verifiers to providing updates on credentials and transactions, OceanOpt keeps your fleet compliant and operational—effortlessly.

Data Accuracy and Integrity

Trust in Every Number

Get precise, trustworthy emissions data delivered through our rigorous verification and cutting-edge Smart Portal. Explore our intuitive platform that ensures accuracy, streamlines data collection, fixes errors, and keeps you aligned with evolving EU standards. Our team constantly sharpens the process, providing insights for regulatory reporting or operational decisions. With our services, accuracy isn't just a claim— it's embedded in everything we do for you.

Data Verification and Submission

Certified Compliance On Time

Ensure your emissions data is expertly verified and submitted through accredited bodies. We manage voyage and monthly statements with precision, delivering them promptly to keep you compliant with charter party clauses and EU regulations. Our streamlined process eliminates guesswork, providing peace of mind and reliable documentation—on time, every time. Trust us to handle the details so you can focus on your fleet.

Accounting

Smart Allowance Management

Simplify your emission allowance accounting under EU ETS and FuelEU with our advanced system. Receive customized statements, declarations, and invoices for specific voyages or periods, with careful tracking of receivables and purchases. Our experts assign allowances precisely, keep an eye on balances, and share insights on changing regulations—keeping you compliant and informed. Let us manage the complexities, while you gain clarity and control over your emissions obligations.

Decarbonization Training

Empower Your Team for a Greener Future

Benefit from expert-led decarbonization training as OceanOpt equips crew and managers with practical skills. Drawing on extensive expertise in EU ETS, FuelEU, IMO Mid-Terms, and emissions management, our team provides focused sessions on compliance, data accuracy, and sustainable operations. From mastering the Smart Portal to cutting carbon footprints, our customized programs enable teams to handle regulations and boost efficiency—transforming environmental targets into real-world capabilities for the fleet.

Consultancy and Compliance Advisory

Navigate Regulations with Confidence

Gain tailored guidance from OceanOpt's expert advisors on EU ETS, FuelEU, MOHA/Thetis, IMO mid-term measures, and wider decarbonization strategies. Our team offers vital insights and practical solutions, ensuring compliance while sharpening operational efficiency. From tackling regulations to rolling out best practices, we align goals with clear, actionable steps—keeping the fleet competitive in a fast-changing industry. Our goal is to boost efficiency and sustainability across all operations.

Purchasing

Unlock Allowance Trading

Get connected to a wide network of vendors, organizations, and traders for efficient emission allowance purchasing. Prepare, strategize, and execute your sustainability goals with our EU ETS experts who will cater to your specific commercial needs. Bring your action plan to life—as we support you by simplifying trades, ensuring readiness for future obligations, and delivering seamless transactions and confidence every step of the way.

Administration and Management

Effortless Account Oversight

Experience comprehensive administration for trading and MOHA as our dedicated team steps in as authorized representatives. Our team handles transactions, oversees processes, and minimizes involvement—smoothing the path to final approval. With one point of contact, we maintain clear communication and teamwork, providing seamless account management that lets your fleet stay the priority with confidence.

Smart Portal

OceanOpt Smart Portal

Automated Emission Management and Performance Monitoring

The Smart Portal is OceanOpt's advanced platform for fleet performance and EU ETS compliance. Its user-friendly interface simplifies tracking emissions, analyzing EU ETS exposure, and managing allowance transactions in real time. Seamlessly integrating vessel logs and external data via APIs, CSV, or Excel, it eliminates manual entry—connecting effortlessly with verifiers like DNV, ABS, Verifavia, and BV, plus trading vendors for carbon allowance management.

Powered by our Data Processing Engine (DPE), it validates data, calculates EU-relevant EUA projections, and generates voyage statements for charterers and owners. Gain vessel-specific insights—global CO₂, EU emissions, and applicable allowances—plus tailored forecasts for CII, FuelEU penalties, and year-end compliance. Optimize with speed recommendations, biofuel simulations, and strategic bunkering guidance.

Monitor FuelEU dashboards for GHG intensity, compliance balances, and penalties, with exportable reports and custom pool scores. From voyage planning to allowance trading, Smart Portal empowers ship owners and charterers with actionable analytics and streamlined workflows—turning complexity into control.

Why Choose Us ?

Simplifying Sustainability for Your Fleet

Dedicated Specialist Team

Our experienced maritime professionals craft tailored carbon solutions to meet your sustainability goals with precision.

Proactive Compliance Approach

We work with top verifiers like DNV and ABS to address compliance challenges and adapt to shifting regulations.

Continuous Improvement

Precision drives us—we refine our processes and keep up to date with EU regulations to deliver reliable, top-tier carbon compliance support.

Cutting-Edge Smart Portal

Our platform streamlines emissions tracking, allowance management, and voyage planning with real-time data.

Extensive Industry Network

Tap into our wide network of traders and vendors for efficient allowance purchasing and strategies.
